

# FreeLifeSTYLE

technology to enhance your life

We project and create innovative systems for going up and down staircases. By connecting floors and slight height differences, in order to ease one's daily life as well as to increase environmental value.

We present you two new product lines, ComfortLine and MovingLine, created for comfort and ease of movement which allows one to use space in an autonomous way.

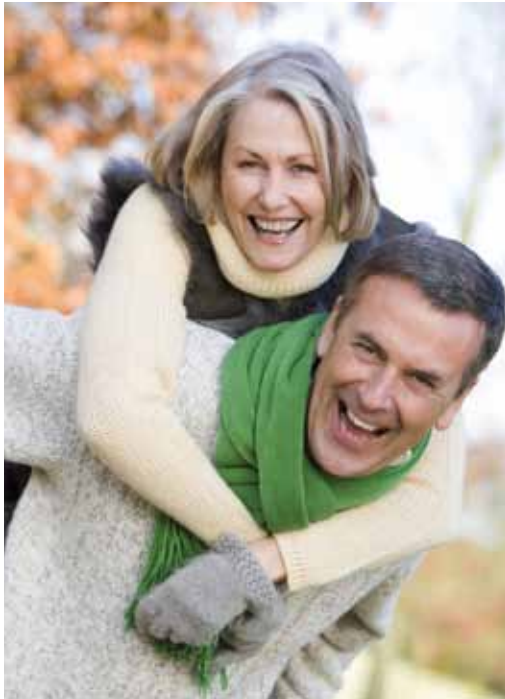

lightness day after day

Movement can become a difficulty for anyone.

With Our Freestyle products, it enhances the spirits of a mother with a buggy, who lives in a building of several floors where one may either temporarily, permanently or due simply over a period of time have natural motorial difficulty, or may be in need of such a product. We help everyone without age limit to access every type of ambience, environment and space in an independent autonomous way.

## experience serving people

To make your life easier is our duty.

We are close to your needs by developing viability in service even after installation.

The attention and care we take in the creation of each of our products is the same attention and care we dedicate to its whole life cycle.

Alongside the customer, we always follow and give our total experience in the field to your every need from the beginning to the end.

We draft with you the ideal solution, by overlooking the site in order to prepare a clear personalized quota, keeping you informed at all times and giving all the necessary support for a subsidized purchase either local or governmental. We carefully take all the necessary and proper measurements accurately, paying attention to the slightest details. All our blueprints are presented meticulously and we give a helping hand to the customer's draftperson for possible structure works.

Our qualified personnel is periodically updated in the latest installation techniques. In order to guarantee that the product be fully functional. Which is carried out by our Authorized Technical Centres and certified by Declaration of Conformity.

We look after our customers during and after the purchase of our products through our customer service centre guaranteeing our customers our total availability. All our items are EC certified and are covered by insurance for civil responsibility on products. We furthermore offer additional services as the opportunity of a 5 year warranty extension\*, programmed maintenance service with prioritized assistance, revision and refurbishing of the existing installations.

*\*Warranty Exthentions Pack available by Authorised Centres*
